

Product Name :
Surface Mount Back flow Soldering Machine

Product Code :
PCBL0020

Description :

Surface Mount Back flow Soldering Machine

Technical Specification :

I. Function

Surface mount backflow soldering machine

II. Technical parameter

1. In welding process, PCB is in static state/ The surface components should be in correct position, and avoid not be soldering.
2. Soldering zone use far infrared ray heat, and high temperature motor force to be heated.
3. Equip with nitrogen protection connector, and use nitrogen to make protection.
