

**Product Name :**  
Surface Mount Back flow Soldering Machine**Product Code :**  
PCBL0020**Description :**

Surface Mount Back flow Soldering Machine

**Technical Specification :**

## I. Function

Surface mount backflow soldering machine

## II. Technical parameter

1. In welding process, PCB is in static state/ The surface components should be in correct position, and avoid not be soldering.
2. Soldering zone use far infrared ray heat, and high temperature motor force to be heated.
3. Equip with nitrogen protection connector, and use nitrogen to make protection.
