

Product Name :
Solar Energy Trainer With Connection To Mains

Product Code :
RENV0024

Description :

Solar Energy Trainer With Connection To Mains

Technical Specification :

Modular trainer for the theoretical-practical study of the electrical installations with photovoltaic solar energy and wind energy.

Composed of:

-A photovoltaic inclinable module, 90W, 12V, complete with a cell for measuring the solar irradiation and with a temperature sensor.

- A wind turbine

- Wind turbine 12 Vdc, 400 W
- Supporting frame 1.5 m.

Anemometer and wind direction sensor.

A set of modules with a supporting frame:
