

Product Name :

IC Trainer

Product Code :

ELTC0016

Description :

IC Trainer

Technical Specification :

This trainer contains various IC , by related experiments, you can get familiar with running characteristic of integrated circuit, master its control principle and control method, and students can get related knowledge and skill. It is suitable for teaching and skill training examine of related majors of vocational training school, college, technician training school and so on. All display for voltage, current is digital display.
