

Product Name :
Process Control Trainer

Product Code :
ELTC0026

Description :

Process Control Trainer

Technical Specification :

Process control is the abbreviation of automatic control of production process, which is an important part of automation technology. Usually refers to the production process of oil, chemical, electric power, metallurgy, light industry, building materials, nuclear energy, etc. In modern industrial production process, process control technology is to achieve optimal technical and economic indicators, improve the economic benefit and labor productivity, improve working conditions, protect the ecological environment plays a more and more important role. Take key technology and equipment system in process industry automation and information system as the main line, we design advanced process control professional laboratory comprehensive training and teaching equipment, set up the theme of the major laboratory engineering training base.
