

Product Name :
Electrical Motor And Transformer Trainer

Product Code :
ELTC0027

Description :

Electrical Motor And Transformer Trainer

Technical Specification :

This trainer include various types of inductive motors and control components, through experiments students can be familiar with AC motor features, master its control principles and control mode, it will cultivate students' technical skills and knowledge. The trainer is suitable for vocational school students, technical schools students, colleges students who major in electrical technology, electronics technology, mechatronics technology etc.
