

Product Name :
Controlling And Switching Trainer

Product Code :
ELTC0028

Description :

Controlling And Switching Trainer

Technical Specification :

This trainer include various types of inductive motors and control components, through experiments students can be familiar with AC motor features, master its control principles and control mode, it will cultivate students' technical skills and knowledge. The trainer is suitable for vocational school students, technical schools students, colleges students who major in electrical technology, electronics technology, mechatronics technology etc.

(1) Training workbench use aluminum column structure frame, it include meter box and power box to test and measure technical parameter, it is easy to use and it is not easy to be broken.

(2) Equipped with motors, students can make combination, and finish many training contents.

(3) Training workbench has high safety system.
