Product Name :	**Product Code :**
Digital Electronic Training Workbench	ELTC0036

Description :

Digital Electronic Training Workbench

Technical Specification :

This training is designed according to course,, , integrated circuit amplify etc. Main content: common semiconductor circuit, device, basic amplify circuit, multi grade Function amplify circuit, integrated function amplify circuit, feedback circuit, signal function And treatment circuit, waveform generator and signal convert circuit, power amplify circuit, DC power etc. analogue circuit, gate circuit, trigger, counter, decoder, encoder, data selector, combinational logic circuit, sequential logic circuit, pulse waveform generation and plastic, D/A converter and A/D converter, semiconductor memory, PLC, digital comprehensive application, Multisim electronics simulation software etc. digital circuit. It is suitable for electronics, electrical, automation, mechatronics, electronics communication.
