

**Product Name :**  
Trainer Kit Power Supply Unit

**Product Code :**  
ELTC0046

**Description :**

Trainer Kit Power Supply Unit

**Technical Specification :**

1 Product overview

1.1 Overview

This training device including AC step-down transformer module, filtering module, measuring module, DC power supply output module and so on, through the relevant experiment, students can Be familiar with the AC power generated by voltage regulator rectifier filtering process of DC power supply. Training the student to the corresponding knowledge and skills, suits, higher vocational colleges, secondary vocational schools and vocational school related professional teaching and skills training examination.
