

**Product Name :**  
Digital Electronics Trainer Kit

**Product Code :**  
ELTC0048

**Description :**

Digital Electronics Trainer Kit

**Technical Specification :**

Device adopts gilded hole, the machine all devices in the negative, positive printing characters of attachment, all the circuit such as signal source frequency meter is made up of CPLD chip and double panel, selects the superior high quality products, all devices are making the quality of the whole experiment box was improved. Due to no positive elements, thus can effectively reduce and avoid the possibility of artificial damage, the machine features: easy to use, durable, flexible experimental project, easy to do digital simulation experiments. This learning machine is suitable for the colleges and universities and all kinds of electronic technology teaching of vocational and technical schools.
