

Product Name :
Power Electronics Shunt Motor Control**Product Code :**
ELTC0059**Description :**

Power Electronics Shunt Motor Control

Technical Specification :

This experimental device can provide excitation voltage and armature voltage for DC motor, and the armature voltage can be adjusted between DC 0 and 220V to realize speed control of DC motor. Through the experiment, and master the principle and control mode, the corresponding knowledge and skills, suits, higher vocational colleges, secondary vocational schools and vocational school related professional teaching and skills training examination
