

Product Name :
AC Circuits Trainer

Product Code :
ELTC0087

Description :

AC Circuits Trainer

Technical Specification :

In this experiment, three waveforms of sine wave, square wave and triangle wave can be output, and three kinds of waveforms can be used for fine adjustment of frequency, amplitude, linearity and duty ratio. A variety of measuring instruments can be completed by providing three kinds of measuring instruments: AC10V, DC100uA and DC10V.

Through the experiment,
