

Product Name :
Relay Protection and Automation Electric Power Systems
Trainer

Product Code :
ELTC0088

Description :

Relay Protection and Automation Electric Power Systems Trainer

Technical Specification :

The laboratory stand is designed for carrying out laboratory works in universities and secondary technical educational establishments for the study of "Power Supply of Industrial Enterprises", "Relay protection and automation", etc. The object of study is relay protection and automation devices in electricity supply systems. Structurally the stand consists of a body in which part of electric equipment, microprocessor measuring system, front panel and desktop of integrated table are mounted.
