Product Name :Product Code :Automatic Sorting Robot TrainerELTC0092

Description :

Automatic Sorting Robot Trainer

Technical Specification :

- (1) Functions:
- A. Its portable size makes it easy to carry out experiments on lab table.
- B. The status of input and output signals are monitored and displayed on nearby status LED.
- C. Easy cabling-using one single flat cable to connect dsPIC Microcontroller Unit.
- (2) dsPIC Microcontroller Unit
- A. Functions:
- (a) This unit includes a dsPIC30F4011 chip and peripheral I/O circuits, which is very helpful to understand the knowledge related with microprocessor control.
- (b) The trainer is protected by a suitcase for easy carrying and storage.
- (c) The pins of MCU are protected by photo coupler.
- (d) Able to use either TACT or Slide switch as signal input.

MCU : dsPIC30F4011(ISP circuit included)

- (a) 6-Bit digital signal controller
- (b) 40 Pins or above
- (c) 48K byte program memory or above
- (d) 2K byte RAM or aljove AC power switch
