

Product Name :
Basic Program Logic Control Trainer**Product Code :**
ELTC0095**Description :**

Basic Program Logic Control Trainer

Technical Specification :**1.1 Profile**

This practical training device includes Siemens 200 smart PLC, practical training simulation module and other control objects. Through relevant experiments, it is familiar with the basic use and programming method of Siemens 200 smart PLC and the use of programming software. To train the students' corresponding knowledge and skills, which is suitable for the teaching and skill training assessment of relevant majors in university, college, higher vocational, high school, secondary vocational schools and technical schools.

1.2 Feature

- (1) Trainer using aluminum column frame and workbench structure, measuring instrument and practical power built-in integration installation, practical circuit and device adopts hanging box combinations, each unit with flexible, easy to use, not easy to damage.
- (2) Experimental circuit and device configuration is complete, can be combined, to complete a variety of subjects of training content.
- (3) Trainer has a good safety protection system. Allows operation, students independent experiment to cultivate students' ability to analyze and solve problems.
