

**Product Name :**  
Speed Variation Magnetic Powder Brake Training Bench**Product Code :**  
ELTC0107**Description :**

Speed Variation Magnetic Powder Brake Training Bench

**Technical Specification :**

This bench can be used to study a drive solution for an asynchronous motor, by simulating various types of mechanical load called constant, proportional or quadratic torque (pump, fan, hoist etc.).

A switch can be used to simulate simple breakdowns to make use of the Altivar diagnostic information.
