

**Product Name :**  
Temperature Measuring Bench

**Product Code :**  
ELTC0113

**Description :**

Temperature Measuring Bench

**Technical Specification :**

The Temperature Training System is a two loop system, using water as the process fluid which allows the study of the principles of process control using primary and secondary circuit temperatures as the process variables to be controlled. Both circuits pass through the heat exchanger and the secondary circuit contains a fan-assisted cooling radiator. Thermistor temperature sensors are located in the inlet and outlet streams of both primary and secondary sides of the heat exchanger and the outlet of the radiator.
