

Product Name :
Home Energy Visualization Test Bench**Product Code :**
ELTC0122**Description :**

Home Energy Visualization Test Bench

Technical Specification :

This system can simulate the process of solar power, so that the students of photovoltaic power generation systems have a preliminary understanding, familiar with the composition of off-grid and photovoltaic generation (dg) in power system, connection and operating principle. To cultivate the students' corresponding knowledge and skills, suitable for the teaching and skills training assessment of higher vocational colleges, vocational schools, secondary vocational schools and technical schools.

1.2 features

- (1) training using aluminum column frame structure, measuring instrument and load module uses the way of hanging box installation, training power built-in integrated installation, with a universal wheel, at the bottom of the various units with flexible, easy to use, not easy to damage.
- (2) the solar panel adopts aluminum profile frame, which can adjust the Angle of solar panel according to the Angle of solar light. The bottom is equipped with universal wheel, which can be moved easily and easily.
- (3) the experimental circuit and devices are fully configured and can be used in combination to complete the training contents of a variety of subjects.
- (4) the training platform has a good security system.
