

Product Name :

Totally Equipped Training Bench for Rotating Machines by AC Current

Product Code :

ELTC0139

Description :

Totally Equipped Training Bench for Rotating Machines by AC Current

Technical Specification :

This practical device includes a variety of types of induction motor and industrial control components, through the relevant experiment,

can be familiar with the operation of the ac motor, frequency converter, servo brake characteristic, to master its control principle and control mode,

the corresponding knowledge and skills,
