

Product Name :
Stepper Motor Experiment Box**Product Code :**
ELTC0143**Description :**

Stepper Motor Experiment Box

Technical Specification :

1. Product Overview:

Stepper motor test box by DC12V four-phase stepper motor, PIC microcontroller control unit PLC control interface unit, the control button, indicator, and other components. Suitable for students at PLC, microcontroller programming control training, and stepper motor control training. Communication with the PC through the USB port...

2. Main parameters:

1, Supply voltage: AC220V, 50Hz;

2, Current: ? 1A;

3, Size: 370mm * 220mm * 120mm (L * W * H);
