

Product Name :
Power System Trainer**Product Code :**
ELTC0150**Description :**

Power System Trainer

Technical Specification :

For simulation in the electrical consumption, it should have lamps and test loads.

The main components of the module must be:

01 charge controller of 10A for the photovoltaic panels

01 charge controller for the wind generator

01 Single phase Plug

04 Lamp modules

01 stationary battery 12 Vcc 18Ah

01 single phase distribution module

01 bipolar circuit breaker

02 duplo switch modules

01 grid tie micro inverter 2030 W
