

Product Name :

Training Bench for Electric Motor Study Electrical and Electronics Lab

Product Code :

ELTC0172

Description :

Training Bench for Electric Motor Study Electrical and Electronics Lab

Technical Specification :

This training device includes a variety of types of induction motor and industrial control components, through the relevant experiment, students can be familiar with the operation characteristics of AC motor, DC motor, to master its control principle and control mode, the corresponding knowledge and technical skills, it is widely applied in higher vocational colleges, secondary vocational schools and vocational school related professional teaching and technical skills training program and examination.

1.2 Features

- (1) The actual training platform adopts the frame structure of aluminum profile, with the bottom with the universal wheel, which can be moved flexibly. The measuring instrument and the actual training power source are integrated and installed, easy to use and not easily damaged.
- (2) The motor is fully equipped and can be used in combination to complete a variety of training contents.
- (3) The training platform has a good security system.
