Product Name : ABB Automation System Display Shelf	**Product Code :** ELTC0175

Description :

ABB Automation System Display Shelf

Technical Specification :

This training device include ABB industrial automation field involved unit configuration software, the upper programming software, product collection PLC, frequency converter, touch screen, the third party equipment such as communication module control-drive-to perform a complete system. In this experiment device can train students basic programming, basic data acquisition and processing experiment, and can let students according to need to select the different equipment design course or the graduation design, training the students not only the basic knowledge of the design and development of high level and provide training platform.
