

Product Name :
Air Compressor Trainer

Product Code :
ELTC0187

Description :

Air Compressor Trainer

Technical Specification :

An air compressor is a device used to compress gas. Piston compressor-is a positive displacement compressor, the compression element is a piston, which reciprocates in the cylinder.

2. Features

Advantages of piston air compressor:

- 1.Wide range of applicable pressure, regardless of the flow rate, can reach the required pressure;
- 2.High thermal efficiency and low power consumption per unit;
