

Product Name :
PLC with Network Communication Training Workbench

Product Code :
ELTC0188

Description :

PLC with Network Communication Training Workbench

Technical Specification :

This training device includes Siemens 1200 PLC, AS-I communication module, touch screen, router and switch and other modules. Through related experiments, you can be familiar with the basic use and programming methods of 1200 PLC and the use of programming software. Study the basic principles of communication and understand Communication between AS-I module, PLC and screen, study the functions of PLC and display analysis signals of different protocols, and deal with the communication examples of industrial machines. Cultivate students' corresponding knowledge and skills,
