

Product Name :
Training Model PLC**Product Code :**
ELTC0191**Description :**

Training Model PLC

Technical Specification :

1.1 Overview

This training device includes Siemens s7-200cpu224XP. Through related experiments, you can familiarize yourself with the basic use and programming methods of S7-200 PLC, and the use of programming software. Cultivate students' corresponding knowledge and skills, suitable for higher vocational, higher vocational, secondary vocational schools and technical and vocational schools related teaching and skills training assessment.

1.2 Features

- (1) Input and output of the PLC module All the terminals are led out to the panel through the adapter terminal, and connected using the K2 test line.
- (2) The experimental circuit and device are fully equipped and can be used in combination to complete the training content of various courses.
- (3) PLC module selects Siemens cpu224XP module, provides digital 14 input, 10 transistor (DC24V) output, 2 analog input, 2 analog output.
- (4) The PLC input can simulate the digital input state through the switch operation.

(5) The USB-PPI programming cable is connected to the computer.

(6) The training platform has a good security protection system.
