

Product Name :
Didactic System Of Domestic Energy Production**Product Code :**
ELTC0205**Description :**

Didactic System Of Domestic Energy Production

Technical Specification :

This training device includes modules such as solar power generation devices, photovoltaic panel power generation devices, inverters, and light-emitting controllers. Through related experiments, you can study the principles of solar and wind power generation, and cultivate students' corresponding knowledge and skills. It is suitable for vocational and vocational colleges , Secondary vocational school and technical school related professional teaching and skills assessment.

1.2 Features

- (1) The training device adopts an aluminum column frame structure, and the power supply is integrated and installed.
- (2) The unit circuit hanging box is fully configured and can be used in combination to complete the training content of various courses.
- (3) The relevant units can be flexibly added to or deleted from the experimental subjects to meet the needs of different users.
- (4) The device has a good safety protection system.
