

Product Name :
Electrical Engineering Workbench

Product Code :
ELTC0208

Description :

Electrical Engineering Workbench

Technical Specification :

Power: 220 to 380 Volt

·Include: transformer, ammeters, voltmeters,

·inductors, capacitor bank, rectifier diodes, capacitor, resistor, halogen lamps and switch with switches

Power: 1.5 KiloVoltiamperio

· Type: Three-phase

Additional characteristics

Measurement of power circuits can be performed.

The connection must be through a banana terminal.

The type of the station must be bancada.
