

Product Name :
Training Station For Multi Process Regulation**Product Code :**
ELTC0214**Description :**

Training Station For Multi Process Regulation

Technical Specification :

The combined Pressure, Level, Flow and Temperature, PH Process Control System is self-contained and has all of the features of the individual Level, Flow, pressure , Temperature and PH systems .

The 4-20mA Analogue set-Point input allows various forms of cascade control to be implemented between linked or interactive control loops.

The process set-point can be selected from the front panel, or in response to a logic input.

II.Features

- Contains a selection of level, flow, pressure, temperature and PH sensors and indicators
- Primary and secondary flow controlled by linear motorised control valves
- On/Off and proportional control

P, PI and full PID control with autotune facility

- Can perform dual loop cascade control

- Water used as the process fluid

III. Curriculum Coverage

- Flow, Level, temperature, pressure and PH familiarisation and calibration
- Interface familiarisation and calibration
- Controller familiarisation and calibration
- Float level transmitter
