

Product Name :
Electrical Maintenance Skill Training Workbench**Product Code :**
ELTC0216**Description :**

Electrical Maintenance Skill Training Workbench

Technical Specification :

1.1 Overview

This training device is used to study the control of Mitsubishi inverter. Through relevant experiments, you can familiarize yourself with the operating characteristics of the three-phase asynchronous motor controlled by the inverter, master the control principle and control method, and cultivate the corresponding knowledge and skills of students. It is suitable for higher vocational and higher. Teaching and skills training assessments for specialized and secondary vocational schools and related majors in technical schools.

1.2 Features

- (1) The training platform adopts an aluminum profile column frame structure with a universal wheel at the bottom for flexible movement. The measuring instrument and the training power supply are integrated and installed, which is easy to use and not easy to damage.
- (2) The motor is fully equipped and can be used in combination to complete the training content of various courses.
- (3) The training platform has a good security protection system.
