

Product Name :
Sodium Hydroxide (Lye)**Product Code :**
SCHOOLSMD1077ALTEC™**Description :**

Sodium Hydroxide (Lye)

Technical Specification :

This is used to neutralize an acid to form salt and water.

In acid-base titration, the sodium hydroxide is used as a titrant added from an base buret to a known quantity of the analyte (the unknown solution) until the reaction is complete.

Knowing the volume of titrant added allows the determination of the concentration of the unknown using the formula :

$$N_a = N_b V_b / V_a$$

pH value : pH 13

Form: Hygroscopic solid

Color: White semi-transparent

Odor: Odorless

Chemical formula : NaOH

Mass per bottle: 250 grams.

Tender product as per DEPED Guidelines.
