

Product Name :
Medical Laboratory Electrothermal Thermostatic Incubator**Product Code :**
HOSPITALLAB70050**Description :**

Medical Laboratory Electrothermal Thermostatic Incubator

Technical Specification :

LCD display, a series of data displayed showed in one window.

Microprocessor PID temperature controller.

Timing range: 1~9999min

Polished stainless steel chamber, easy to clean.

Cold-rolled plate with power coating.

Shelves can be adjusted easily.

Double door design. Inner door is made of tempered glass for observation.

Door heating to avoid water condensing on the inner glass door.

Forced convection for a better temperature uniformity.

Magnetic door sealing.

Castors are equipped for easy movement.
