

Product Name :

Medical Hospital Lab Automated Glycated Hemoglobin
Hba1c Analyzer

Product Code :

MEDICALLAB7100012

Description :

Medical Hospital Lab Automated Glycated Hemoglobin Hba1c Analyzer India China

Technical Specification :

High-definition color touch screen, touch-tone menu, operation freely

Put 20ul whole blood into sample cup, press "START: to test directly

3.5 minutes per sample

15 sample positions, CAL1, CAL2, QC, ST

USB Port: Connect with LIS system to manage and analyses the results, support remote online upgrade

TF card storage, copy the data into the computer freely, print consolidated report, make sure that the user enjoy the best service.

PS-2 port, external barcode scanner

Simple Maintenance

Fully modular design, all components are installed in 7 modules. If fault occurs, can find the damaged parts quickly and accurately, solve problems with fastest response.

Use constant peristaltic pump for reagent pump, high precision for flow liquid, small pulse, long life, pump tube replaced every six months only.

Reliable temperature control system, ensure the separation system not effected by the outside temperature, and also can eliminate the unstable substances of samples effectively, so that the heating and separate detection can be done simultaneously

Reliable sample positioning detector can ensure the consistency of injection volume, Dual-level liquid sensor can prevent false alarms during the operation, but also detect the lack of reagent volume timely.
