

Product Name :
Medical Laboratory Biological Safety Cabinet**Product Code :**
MEDICALLAB7100014**Description :**

Medical Laboratory Biological Safety Cabinet India China

Technical Specification :

Biological safety cabinet is a kind of negative pressure device widely used in microbiology, biomedicine, gene recombination, animal experiments, biological products , other fields of

scientific research, teaching and clinical examination.

It adopts the advanced air purification technology and vacuum box design to protect the environment, people and samples, which is the basic laboratory bio-safety protection equipment.

Used in laboratories with one to three level of bio-safety . Applicable objects is in BSL 2 and BSL 3.

When air outlet is connected with outside, this equipment can also be applied for biology experiments with trace volatile toxic chemicals and limited radionuclides as additives.
