

Product Name :

Laboratory Humidity Control Equipment Artificial Climate Chamber

Product Code :

MEDICALLAB7200001

**Description :**

Laboratory Humidity Control Equipment Artificial Climate Chamber India China

Technical Specification :

This product is a dedicated constant temperature and humidity experiment equipment with illumination, which is suitable for plant and tissue culture, plant germination, culture of seeding, microbes incubation, insects and small animal feeding, water body BOD test, aging and service time test of medicine, wood and building material, etc..

LED digital tube display with easy operation.

Microprocessor PID control, accurate and stable.

30 phase program design. Each phase is with 9999 hour or min for the maximum timing.

Stainless steel chamber, easy to clean.

Shelves adjustable easily.

Touch-button with flexible operation.

Magnetic door sealing.

The fluorescent lights are equipped at both side of the incubator.

The special glasses with good heat insulating ability and light transmittance are installed between the fluorescent lights and the chamber, and on the inner door, which reduces the heat transmission into the chamber and ensures the desired light intensity.

Forced convection for even temperature.

Freon-free refrigerant, eco-friendly and highly efficient.

Over-temperature protection.

Temperature sensor open circuit or short circuit protection.

Auto-off protection and alarm if there's abnormality.

Parameters auto-save when power interruption or system breakdown.
