

Product Name :

Hospital Dry-Type Fluoroimmunoassay Quantitative Analyzer PCR

Product Code :

MEDICALLAB7200006

**Description :**

Hospital Dry-Type Fluoroimmunoassay Quantitative Analyzer PCR India China

Technical Specification :

Infection: hsCRP+CRP, PCT

Cardiac Markers: NT-proBNP, CK-MB, Myo, cTnI, H-FABP, 2 In 1 (CK-MB/cTnI), 3 In 1 (CK-MB/cTnI/Myo)

Diabetes: HbA1c

Coagulation: D-Dimer

Advantages of our Micro Analysis Testing System:

Light and portable appearance: small size, designed for primary healthcare center, point-of-care test, clinics and emergency ward

Bilingual Surface: An intuitive interface; 7-inch interactive touching type colored tablet and dynamic prompt guideline pages.

Smart and Flexible system: Automatic pattern, scan and identify the testing items by the bar code, and the testing report will be printed and uploaded automatically to LIS/HIS

Various Testing Samples: Micro detection, support whole blood, plasma and serum sample testing

Simple Operation: Simple and quick testing, can be operated without complicated training

Multiple Ports: can be connected to serial port, USB, Ethernet, Wifi and 3G
