

Product Name :Hospital 300t/H Fast Test Automatic Chemistry Fully Auto
Biochemistry Analyzer**Product Code :**

MEDICALLAB7200013

**Description :**

Hospital 300t/H Fast Test Automatic Chemistry Fully Auto Biochemistry Analyzer India China

Technical Specification :

Biochemistry Analyzer is designed for hospital or clinical laboratory to measure the quantity of chemical or biochemical components in human serum, urine and other liquid sample, used to test liver function, kidney function, cardiac markers, blood sugar, blood lipid, etc.

Test speed: 300T/H (without ISE)

Sample tray: 120 sample positions, compatible with disposable blood collection tubes, micro cups, plastic test tubes

Reagent tray: 80 online reagent positions, with advanced refrigeration system, reagent storage 4-16 ° C

Sample needle:

Sample needle, highly polished inner and outer wall, with liquid level detection, tracking and anti-collision protection

Reagent needle, highly polished inner and outer wall, with liquid level detection, tracking and anti-collision protection function

Cuvettes, 6-step 12-step cleaning method, low carryover rate

Stirring rod: double independent stirring rod, made of special material, the surface is treated with Teflon, no liquid, stirring

Thoroughly clean before and after to prevent carryover pollution

Water consumption: no more than 15 liters / hour

Dimensions: length x width x height: 910mm x 725mm x 1034mm

Standard configuration: analysis department, operating software

Net weight: 155kg
