

Product Name :

Medical Blood Test Machine Hospital 3-Part Hematology Analyzer

Product Code :

MEDICALLAB7200015

**Description :**

Medical Blood Test Machine Hospital 3-Part Hematology Analyzer India China

Technical Specification :

Use the most advanced binuclear embedded digital circuit system, to make the analytical ability great and stable

2 counting channels of WBC and RBC, to make the test results more accurate and less cross- contamination

Use CPLD technology in data processing, to avoid the interference of electromagnetic signals

ARM intelligent micro-processing technology

Data analysis: intelligent pulse formulation technology

Classification: floating landmark technology

Module design, fast maintenance

10.4"large color LCD displays main menu and all parameters & color histograms in one screen

Brief operation instruction built-in software, easy for user to view

Separate module design, very simple mechanical structure, easy maintenance

Self check for hardware, alarm for error

Reagent depletion alarm for Lyse, Cleanser and Diluent, as optional function

2 counting mode: whole blood, pre-dilution blood

Sample pre-dilution: internal diluter, add 1ml diluent automatically by the needle, no need to add diluent manually to avoid deviation.

Calibration: automated or manual

QC: comprehensive QC program, forming and printing the histogram automatically

Block removal: Real time monitor, high ignition, soak, flush and back flush
