

Product Name :
Hospital Portable Multiple Parameters Laboratory Visible Spectrophotometer**Product Code :**
MEDICALLAB7200022**Description :**

Hospital Portable Multiple Parameters Laboratory Visible Spectrophotometer India China

Technical Specification :

With microprocessor controlled, can realize auto Zero and auto 100%T adjustment with one push-button. V-5000 has a LCD display instead of LED display for direct readout of Transmittance, Absorption, and Concentration.

Uses 1200 line grating which ensures high resolution, low stray light and high parameters accuracy.

is equipped with USB port which can be connected to PC to edit data through specific software. Data can also be printed through a parallel port when connected to a micro printer.

The compact design of saves bench space while all components function remain performed like 120mm wide sample compartment and long optical path monochromator.

Address: 75, Lajpat Nagar-IV, New Delhi-110024 **Phone:** +91-9311469084
