

**Product Name :**  
Economical Portable Automated Biochemistry Analyzer**Product Code :**  
PHARMALAB7300021**Description :**

Economical Portable Automated Biochemistry Analyzer

**Technical Specification :**

The instrument can detect up to 26 items, up to 14 individual reagent plate test items (excluding calculation items), and the reagent plate is disposable.

The instrument does not have the traditional biochemical analyzer pump, piping, cleaning and other consumables. The only consumable is the printing paper.

Portable design, light weight, only 5 kg, and small size, saving space.

Medical reagent tray

The reagent tray is equipped with a lyophilized reagent bead and a water cup (for the diluent) for one-time use and a storage temperature of 2-8 degrees Celsius. The white retaining ring prevents the sample remaining in the sample port during centrifugation from escaping and contaminating the environment inside the chamber. The QR code contains product information and other specific features.
