

Product Name :
Wheeled Partition 100 x 160cm**Product Code :**
HOSPE0012**Description :**

Wheeled Partition 100 x 160cm

Wheeled partitions with a plain white infill panel to provide booth privacy and protection. Each wheeled partition is made from durable aluminium and the infill panel is a white PVC foam board. Both materials have a smooth finish so can easily be cleaned to ensure the effective control of contamination. Each wheeled partition has a black rubber gasket around the perimeter between the frame and the infill panel. This ensures a sealed finish and also makes sure your panel fits snug and does not rattle within the aluminium frame. All four castors have breaks.

These wheeled partitions are ideal for schools, authorities, hospitals, medical lab, hospital lab and other organisations where social distancing and private screens are key to completing the successful roll out of the testing and vaccination programme.

Technical Specification :

Wheeled Partition 100 x 160cm
