

Product Name :
Balance 120 x 0.0001g**Product Code :**
ELCBLC1020006**Description :**

Balance, 120 x 0.0001g

Technical Specification :

Analytical balances with 0.0001g (0.1mg) readability are equipped with a glass-enclosed weighing chamber, which disassembles quickly for easy cleaning.

Innovative design enables a reduction of the balances footprint, so it occupies less space but retains the highest level of performance.

A single piece of extruded aluminum forms the balance base.

The aluminum provides superior thermal transfer for a more regulated temperature, while the solid core is more rigid, offering greater stability and enabling highly repeatable results.

The internal mechanism is fabricated using hardened materials, helping the Balance tolerate rigorous laboratory use.

FEATURES :

Pan size: 90mm

Capacity: 120g

Readability: 0.0001g

Draft shield: Chamber: 165 x 145 x 240mm

Dimension: 344 x 220 x 340mm (H x W x D)

Robust metal housing protects internal components.

Colour-coded keys facilitate quick recognition of the most frequently used buttons.

Removable draught shield on models with 0.001g readability helps to reduce errors caused by air currents.

Sealed keypad protects against dirt and accidental spills.

USB and RS-232 interfaces provide easy communication with computers and printer. AC adapter included.

External calibration allows for verification and adjustment with weights.

Selectable digital filtering helps minimise effects of vibration and disturbances.

Zero-tracking feature ensures display returns to zero reading.
