

Product Name :

Hub Kits

Product Code :

ROBT10500009

Description :

Hub Kits

Technical Specification :

Plug-and-play with graphing calculators.

Durable, made for the classroom.

I/O ports support additional components to expand System functionality.

Built-in LED, RGB, light sensor and speaker for quick coding projects.

Plug-and-play and ready-to-use with graphing calculators, the Hub enables students to learn basic coding and design, use those skills to program and build working solutions, and connect STEM concepts.

Supports an external breadboard to create and build projects

Launch Pad Board inside is the same technology used by real engineers to design products

Extended functionality

The Hub supports the CE graphing calculator and the CX handheld and software.

Code. Design. Build.

Open new channels for inquiry, exploration and collaboration with free activities for technology.

Create, Experience.

Embed coding and engineering design into engaging math and science lessons with the Hub and graphing technology.

Contents :

Hub
