

Product Name :
Sodium Benzoate Taste Test Vial

Product Code :
GENTS10900003

Description :

Sodium Benzoate Taste Test Vial

Technical Specification :

Sodium benzoate test paper detects the genetic ability to taste Sodium Benzoate.

Homozygous-dominant and Heterozygous-dominant individuals will detect the molecule.

The taste detected varies from sweet, salty, to bitter, depending upon the individual.

Instructions:

Remove a strip of test paper from the vial.

Stick out your tongue, and place the strip on your tongue.

You may not taste anything, but if you do, there are three basic results: sweet, salty, and bitter.
