

Product Name :
Inoculating Loop Holder Metal

Product Code :
MICBOL1080005

Description :

Inoculating Loop Holder Metal

Technical Specification :

Inoculating loop holder, metal, 150mm.

An inoculation loop, also called a smear loop, inoculation wand or microstreaker, is a simple tool used mainly by microbiologists to retrieve an inoculum from a culture of microorganisms.

Length: 150mm

The loop is used in the cultivation of microbes on plates by transferring inoculum for streaking.
