

Product Name :
Urine Multi-Purpose Test Strips**Product Code :**
HALTH10900013**Description :**

Urine Multi-Purpose Test Strips

Technical Specification :

The Multiple Urine Test Strip is used for the detection of Glucose, Protein, Ketones and acidity/alkalinity in education.

The Multiple Urine test strip is suitable for education and training students in all levels of medical and clinical-biochemical educational programs.

Although the Multiple Urine test strip is determined strictly for use in an educational environment and cannot be used in the medical field, the units of measurement are the same as would be found on the diagnostic test strips used in medical practice.

Instructions :

Remove one test strip from the vial. Do not touch the test pads with your fingers.

Dip the strip in to the urine being tested for 1-2 seconds and remove.

After 10 seconds, compare the pH pad to the color chart.

After 1 minute, compare the Ketones pad to the color chart, followed by Protein, and Glucose.
