Atomizing Disinfection Robot for Lab

Technical Specification :

The atomizing disinfection robot is by quickly atomizing the disinfectant and automatically spraying into the disinfection area to get the air effectively purified. Using 100mg/L hypochlorous acid disinfectant, according to the amount of 5ml/m³, continue to spray evenly into the space to disinfect.

Support the use of disinfectants such as hydrogen peroxide, sodium hypochlorite, and peracetic acid.

The large-capacity 16L disinfectant tank can continuously disinfect for more than 5 ~ 6 hours, and the disinfection coverage is up to 4000 ~ 5000 m².

Support APP control, no-touch automated disinfection greatly improve the safety of use in the disinfection process.

Two disinfection modes: timed disinfection and immediate disinfection.

With autonomous navigation function, lidar obstacle avoidance, can fully cover the required area.

Support automatic return to charge, human assistance isn't required

When the disinfectant is below the warning position, it will return to the waiting area and turn off the spray device automatically.
