

Product Name :
Handheld UV Lamp**Product Code :**
UVLMP0001**Description :**

Handheld UV Lamp

Technical Specification :

The handheld UV lamp irradiate the single-cell microorganisms such as cells and viruses with UV light to destroy the structure of DNA in the center of their lives, so that the proteins that make up this organism cannot be synthesized, causing them to immediately die or lose their ability to reproduce. Under normal circumstances, UV light irradiation for more than 10 seconds can achieve the effect of sterilization. It is suitable for the sterilization and disinfection of computer keyboards, tablet PC, mobile phones, desktops, door handles and kitchen utensils.

Consumption: 3W 1W

Light Tube Size: 100mm

Lamp wavelength: 253.7nm (no ozone)

UV Lamp Service Life: 6000 hours

Material: Shell: ABS; Light tube: Quartz

Operating Temperature: 0~60?

Relative Humidity: 10~75% RH

Power Supply: 4 AAA batteries, or connect to USB power 2 AAA batteries
