

Product Name :
ELISA Kits for Lab**Product Code :**
ELSAKT0001**Description :**

ELISA Kits for Lab

Technical Specification :

The hepatitis B virus particle is composed of outer membrane proteins (S protein, pre-S1 protein, pre-S2 protein) and the core-shell. The HBV pre-S1 and core antigens are not only markers of HBV infection, but also of viral replication, and they are highly correlated with the amount of HBV DNA, collectively known as hepatitis B virus nucleic acid related antigen (HBV)
