

Product Name :
Special Protein Analysis System**Product Code :**
POCT0002**Description :**

Special Protein Analysis System

Technical Specification :

Rapid: New fast immunity measurement system. Test result can be reported within 2 minutes

Quantitative: Dual system of nephelometry and turbidimetric tests, high sensitivity, wide test range.

Convenient: RF type non-contact magnetic card of reagent information, touch screen is easy to operate. automatically recognize blank and calculate results.

Reliable: Specimen dilution and calibration of hematocrit(HCT) make the result uniform.

Throughput: 20-120 sec/test

Display: 5.6 inch LCD touch screen

Channel: Signal channel Dual channel

Test Structure: Replaceable laser device and integrate test structure.

Measuring Principle: Dual system of nephelometry and turbidimetric test with higher sensitivity and wider testing range

Sample Type: Peripheral whole blood, vein whole blood, serum, plasma, urine

Sampling Mode: Automatic numbering, 1~999 for same test, optional barcode reader

Sample Dilution: 1~50 times adjustable, convert results automatically
